Notes ID: 7A43193989C71E09AA28A33F06D3C889

From: "Farris, Ann M (DEC)" <ann.farris@alaska.gov>

To: Brandon Perkins/R10/USEPA/US@EPA

Delivered Date: 02/21/2012 11:52 AM PST

Subject: RE: Final PPRTV file for Sulfolane (CASRN 126-33-0)

Do you mean the March TPT meeting? Or is there some other update? And are we talking about the benchmark value?

Thanks Brandon. I also wanted to ask if you received the draft revised site characterization report. OR the draft risk assessment? Flint Hills indicated they were giving you deliverables at the same time as DEC. Let me know if you haven't received them.

Subject: RE: Final PPRTV file for Sulfolane (CASRN 126-33-0)

Thanks Brandon. What are your thoughts on how long it will take for E&E to finish the PA and scoring once the final benchmark is available?

Steve and Larry will be there on Feb. 28th, not the 29th. Steve corrected me this morning.

Thank you for the help,

Ann

Hi Ann

I heard back that there is an estimated benchmark value. I'm waiting to hear on when a final value will be released and posted on the SCDM website.

Steve understands, but Larry doesn't and he tends to bring things up multiple times anyway.

The report will be final on March 16 and will have a draft feasibility study on April 13.

The risk assessment will be complete in March too.

Hi Ann

I haven't heard anything, but I can check in with HQ to see where they are at with it. But please understand that it has only been about a week since the PPRTV document it was released.

I thought Steve was at the TPT meeting when I gave the presentation. In fact he asked questions. How does he not understand the process?

Any updates on the site characterization report going final?

Hey Brandon-

Any update on this? Steve Bainbridge and Larry Dietrick are meeting with Dan Opalski on February 29th and they what like to have an update on this. Just to give you some heads up, I think they are going to ask you to give some kind of presentation on the process. Larry seems pretty upset about the length of time and he still doesn't seem to understand that there are options other than an NPL listing if the score is higher than 28.5. I don't know what exactly will get asked of you, but I just didn't want to come up out of the blue if this does come up.

Ann

Ann

Not sure on the time frame. We need to see if a HRS benchmark can be developed first. Then go from there.

Has there been an progress on making the site characterization report final?

Thanks Brandon. Any thoughts on when you'll be done with the preliminary assessment and scoring now that this is done?

Thanks,

Ann

Final PPRTV

file for Sulfolane

(CASRN

126-33-0)

Hello Michele,

Attached is the final PPRTV manuscript for sulfolane (CASRN 126-33-0).

The manuscript has been reviewed and cleared and may be added to the
data base. Also, I have attached a table that contains details
regarding the content of this PPRTV and any changes compared to the
previous assessment.

Please let me know if you have any questions. Thank you!
